

MIND HUB.

An aerial night photograph of a city, featuring a multi-lane highway with prominent light trails from vehicles. The city lights are visible in the background, and the entire image has a blue color cast. Decorative elements include pink L-shaped brackets at the top center, a dashed line at the top right, and a series of horizontal pink lines on the right side. A large, semi-transparent blue 'U' shape is on the left, and a white bracket-like graphic is at the bottom right.

Subject: Welcome and First Steps

Hello,

Welcome to Web Code! This is an exciting time for you to come on board, as has several new projects in the pipeline as “Amazing Events”.

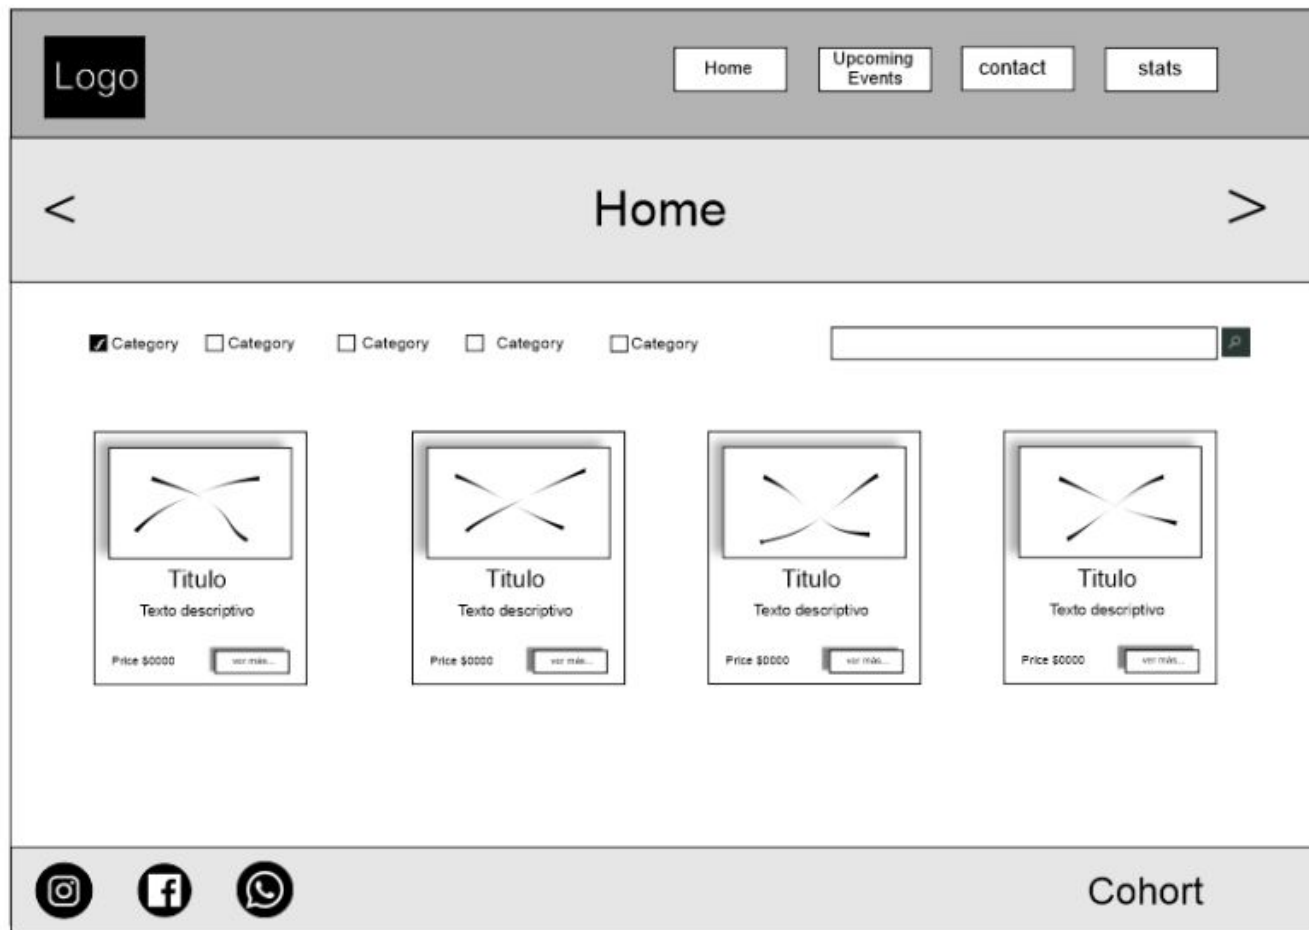

The idea is develop from zero the app, but first we need to send us some exercises on javascript to see your abilities in that language

I know I want you on this project, but I'm still working with Amazing Events to clarify just what they'd like us to do for them. I'm meeting with them this week, so we'll have more detail soon You come to us recommended as an HTML/CSS expert, which is great.

While I working with Amazing Events on their project goals, I'd like you to brush up on your JavaScript and get ready to amaze us all!

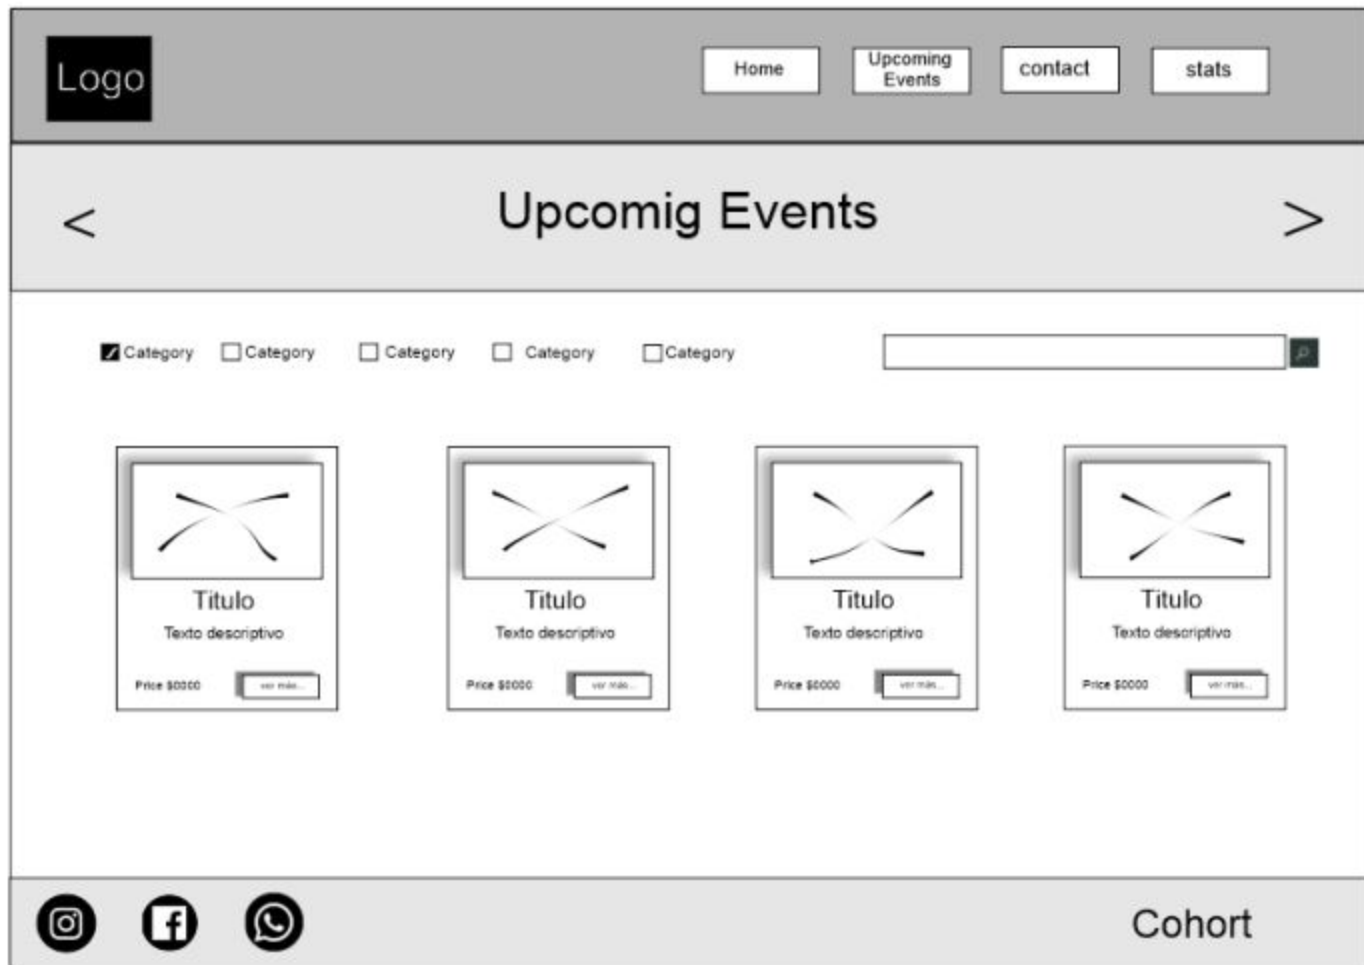

Thanks,
Paula Paula Davis

Events statistics

Events with the highest percentage of attendance	Events with the lowest percentage of attendance	Event with larger capacity

Upcoming events statistics by category

Categories	Revenues	Percentage of attendance

Past Events statistic by category

Categories	Revenues	Percentage of attendance

Cohort

Datos

Cada evento contiene los siguientes datos.

- name
- date
- description
- category
- place
- capacity
- assistance or estimate
- price

Entrega

- **Miércoles 11 de Mayo 18 hs**

- Debes contar con los 6 HTML (Home, Upcoming Events, Past Events, Contact, Details, Stats) presentados anteriormente en los mockup
- Tu navBar debe estar funcionando y debe ser posible navegar entre las distintas páginas
- Evita tener errores de Validador, estructura correctamente tu carpeta del proyecto y define acertadamente los nombres de cada uno de los archivos.
- Puedes utilizar tu propio CSS o la librería de tu preferencia, si lo realizas con librería procura que tu proyecto te represente, es decir que no sean los componentes idénticos a los que se encuentran en la librería.
- Incorpora el logo y el favicon en tu página
- El detalle en las tarjetas que se encuentran en Home o en Upcoming y Past events debe ser menor a la que encontraremos en detalle, ya que esta última completa toda la info del evento y las anteriores son resumidas o de introducción al evento
- Utiliza las fotos que te enviamos para armar las card de los eventos
- Distribuye correctamente los espacios y ten en cuenta que este proyecto será full responsive

¡EXITOS....!
